Bedankt voor de reminder.

Hierbij de stappen voor de emu config.

Step 1: Login to device through CLI.

Step 2: Run the following commands to go in to Config mode and view the EMU

- MA5600T: enable

- MA5600T: Config

- MA5600T(config): Display EMU 0 (the output below will be received)

```
Command:
        display emu
EMU parameter
----------------------------------------------------------------------
  ID  Type              State      |  ID  Type              State
----------------------------------------------------------------------
  0   SMU               normal     |  1   FAN               normal
  2   -                 -          |  3   -                 -
  4   -                 -          |  5   -                 -
  6   -                 -          |  7   -                 -
  8   -                 -          |  9   -                 -
  10  -                 -          |  11  -                 -
  12  -                 -          |  13  -                 -
  14  -                 -          |  15  -                 -
  16  -                 -          |  17  -                 -
  18  -                 -          |  19  -                 -
  20  -                 -          |  21  -                 -
  22  -                 -          |  23  -                 -
  24  -                 -          |  25  -                 -
  26  -                 -          |  27  -                 -
  28  -                 -          |  29  -                 -
  30  -                 -          |  31  -                 -
  32  -                 -          |  33  -                 -
  34  -                 -          |  35  -                 -
  36  -                 -          |  37  -                 -
  38  -                 -          |  39  -                 -
```

Step3: Identify the which EMU is for the FAN and which EMU is for SMU (EMU 0 is for SMU and EMU 1 is for fan)

Step 4: Delete the EMU with the following commands

- MA5600T(config): emu del 0

- MA5600T(config): emu del 1

Step 5: run the following commands to add the EMU back in the OLT

- MA5600T(config): emu add 0 SMU 0 0

- MA5600T(config): emu add 1 FAN 0 0

Step6: Save the configuration by running the save command.
